

## ASGA Position on Decal Usage

### ASGA Position Statement

Reports in relation to decal issues are increasingly coming into the ASGA. We have been advised of haulers who attempt to have “knock off” decals, including multiples of the annual renewal decals, printed in an effort to bypass the legitimate truck registration process.

It is the position of the Alberta Sand & Gravel Association to treat these reports seriously. We are contacting businesses across the province to advise them that, under no circumstances, should the ASGA truck registry established decal styles or logo be replicated. If requested to do so, they will be asked to notify the Association’s Executive Director immediately.

ASGA is also contacting municipalities to advise them of the concern, and provide listings of vehicle numbers that have current/valid registration, and those which do not. Local bylaw enforcement personnel will be asked to notify ASGA if any inconsistencies are noted.

There will be ZERO TOLERANCE by ASGA and its member companies for trucks attempting to bypass the legitimate registry requirements, and for those who use fraudulent decals.

NOTE: The ASGA Truck Registry Program allows only **REGULAR MEMBERS** (i.e. Producers with development permits) to register vehicles, renew vehicles, order replacement decals, update information, and review the listings of vehicles registered by their company.

**THERE IS NO OTHER SOURCE FOR OBTAINING ASGA TRUCK REGISTRY DECALS.**
